Cell 0842743163

ROOI ELS MODEL PRIMWOOD BIN:
 Variable Recycled plastic bin. Latch does rust so purchase an extra one plus a carabiner. Permanent fixture. Good for holiday house.
Contact: Primwood in Hermanus 0282849000 or 0823207991

METAL CAGES:
 Custom made price variable. Permanent fixture. Good for holiday houses. Best practice is to have small mesh or put planks on the bottom to stop their fingers fitting through the holes.

MAINTENANCE REQUIRED.
 The lid must be attached and have a locking device such as a carabiner.

A **Wheelie Bin** without a strong locking device must be kept upright by being attached to a pole etc. The baboon's weight on the lid would keep it closed. Once on its side, they can get their hands inside.

REDUCE • REUSE • RECYCLE

By **REDUCING** the amount of rubbish that goes into our bins, or taken to the waste drop off sites, we can help our community in a variety of ways.

Radically reducing throwing out any household food scraps will remove animal attractants from rubbish depositories and help wildlife as well as mitigate animal/human conflict.

RECYCLING gives back to the community at large. See below for the expansive list of what is needed.

The Butterfly Effect is a Betty's Bay initiative and registered NPO.

They are a small, dedicated group of folk engaged in community and animal well-being. They are very enterprising and can repurpose a whole host of things from your household that you might otherwise throw in the rubbish. Their needs continuously change.

Please contact Natalie at 082 883 0580 for the latest updates.

Reuse, Recycle, Reduce and feel good about yourself!

WELFARE RECYCLING THE BUTTERFLY EFFECT

- **Bread bags** - we package dog and cat food for distribution as well as selling subsidised pet food to communities.
- **Bread bag tags** - we give this to a lady in Elsie's River who collects them for the church "Bread Bag Tags for Wheelchairs" project.
- **Glass jars with lids** - we distribute these to folks who bottle, pickle & preserve - in turn, they often give us products for hampers, etc. to use for our fundraising.
- **Plastic bottle tops** - these are forwarded to the NG Church and Kleinmond Primary for their initiatives.
- **Veggie and meat scraps** - veggies separate from meat, no onions please (bad for dogs) - we make dog stew and cat pate from the waste food which helps to feed animals in need. The waste can include unused veggies or peels, meat about to expire, been in freezer too long or simply bones and scraps from the braai or cooking and can include left over food such as stews, pasta, etc.
- **Other kitchen items like sealed jars, packets, canned foods, sauces, etc.** - we support a few feeding schemes and can therefore distribute those to assist human feeding schemes - if expired, depending on what it is, it can still be used for dogs - very little is actually thrown away.
- There is quite a demand for **second hand Afrikaans bibles, reading glasses and dictionaries.**
- We also take dog and cat medicine, leashes, collars, bowls, blankets, harnesses, food, carriers, beds, scratching posts, etc. Most are distributed to good pet owners and the meds we take to our vet or animal sanctuaries for welfare treatments.

WELFARE GOODS THE BUTTERFLY EFFECT

- We support bedridden elderly with **adult nappies and linen protectors.**
- **Medical equipment** such as crutches, commodes, wheelchairs, nebulisers, walkers, etc. are distributed in Kleinmond, Grabouw, Bossiesveld & Villiersdorp.
- **Unwanted household goods** such as linen, curtains, materials, knitting stuff, bric-a-brac, pots and pans, clothing, books, tools, garden stuff, etc.
- **Appliances - working or not** - we can often repair to sell and if not, will pass on to recycling.
- **Electronics - working or not** - we sell that which works but that which doesn't is passed to entrepreneurs who use the parts or try and repair them to sell to earn a living.
- **Furniture** - we will collect.
- **Hardware/Building Materials** - this includes roof sheets, windows and frames, stripped built-in cupboards, security gates, doors, half tins of paint, tiles, sinks, etc. - we help folk repair or upgrade their homes.
- **Wood and Sheeting** - we use wood and off cuts of roof sheeting to build kennels for distribution.
- **Outside gates, poles, fencing** - to help unchain dogs in townships and improve their living conditions.

RECYCLING

- **Glass, Metal and Tin, Hard Plastics and Cardboard** - all rinsed or cleaned please.

Please check on local WhatsApp or Facebook groups with regards to up-to-date information on the drop-off sites.
